 Managing Risk to Your Mission IS Possible...

Information Technology Security Awareness Fair
 October 2, 2012

Sheraton Grand Sacramento Hotel
 1230 J Street, Sacramento CA 95814 [click here for map](#)
 8:00 AM - 5:00 PM

Preparing Government for the Modern Cyber Security Landscape

- Identifying the real threats to missions of California Government
- Designing a protected environment that balances the needs of the program areas, technology, and constituent
- Understanding new technologies used to protect Government Operations from attack

The IT Security Awareness Fair Addresses Information Security Issues for both the Technology and Programmatic Professional

- Executive content that focuses on how to best provide service within a secure environment
- Information on the reality of intrusion efforts delivered by public and private security industry leaders
- Technology training to keep security personnel current with tools to protect government operations

Educational Tracks Designed to Present Information to all Members of the Security Team - From the Director to the Field Staff

- Tracks include: Security within a Cloud Environment, Assessing the Threat Landscape, Law Enforcement and e-Discovery
- Workshops that deliver hands-on education around securing a virtual environment: Establishing a Security Capability Baseline, and The Do's and Don'ts of Breach Notification
- Top Speakers including California Technology Agency Secretary Carlos Ramos, NIST Fellow Dr. Ron Ross, and U.S. Homeland Security's National Cyber Security Division Director Kelvin Coleman.
