Office of Technology Services

Engineering/Window Services/Windows Projects
Systems Software Specialist III (Technical) \$6388 - \$8396
Permanent/Fulltime
Final File Date: 12/23/16

Who Are We?

The Department of Technology's Office of Technology Services (OTech) is one of the largest suppliers of information technology services to state, county, federal, and local government entities throughout California. Through the use of a scalable, reliable and secure statewide network, combined with expertise in voice and data technologies, OTech delivers comprehensive, cost-effective computing, networking, electronic messaging and training solutions to benefit the people of California. We are one of the few state entities with a state of the art Tier III data center.

Staff operates out of the Rancho Cordova area, supporting the operations of some of the largest and most sophisticated computer systems in California. Our services help ensure that critical information technology applications Californians depend on every day are available and secure.

We provide excellent health benefits, generous vacation and sick leave accrual, exceptional retirement benefits, 11 paid state holidays, and two paid professional development days per year and value the importance of your work life balance. We are committed to growing all of our talented staff. This position is located in Rancho Cordova with free parking.

What You'll Be Doing...

As a Systems Software Specialist (SSS) III (Technical) you will provide technical project services with a mastery level knowledge for the most complex provisioning solutions that will need to be designed, integrated and implemented into the California Department of Technology (CDT) enterprise service portal. The SSS III (T) will also work closely with customers and other OTech service units in the analysis of business/technical requirements, product specifications, and network requirements to implement the necessary service components, as part of the enterprise portal design. Additionally, this position will lead in the development of the automation of complex server installation and configurations, tuning, troubleshooting and problem resolution in both physical and virtual / cloud platforms.
